Beauty . . .

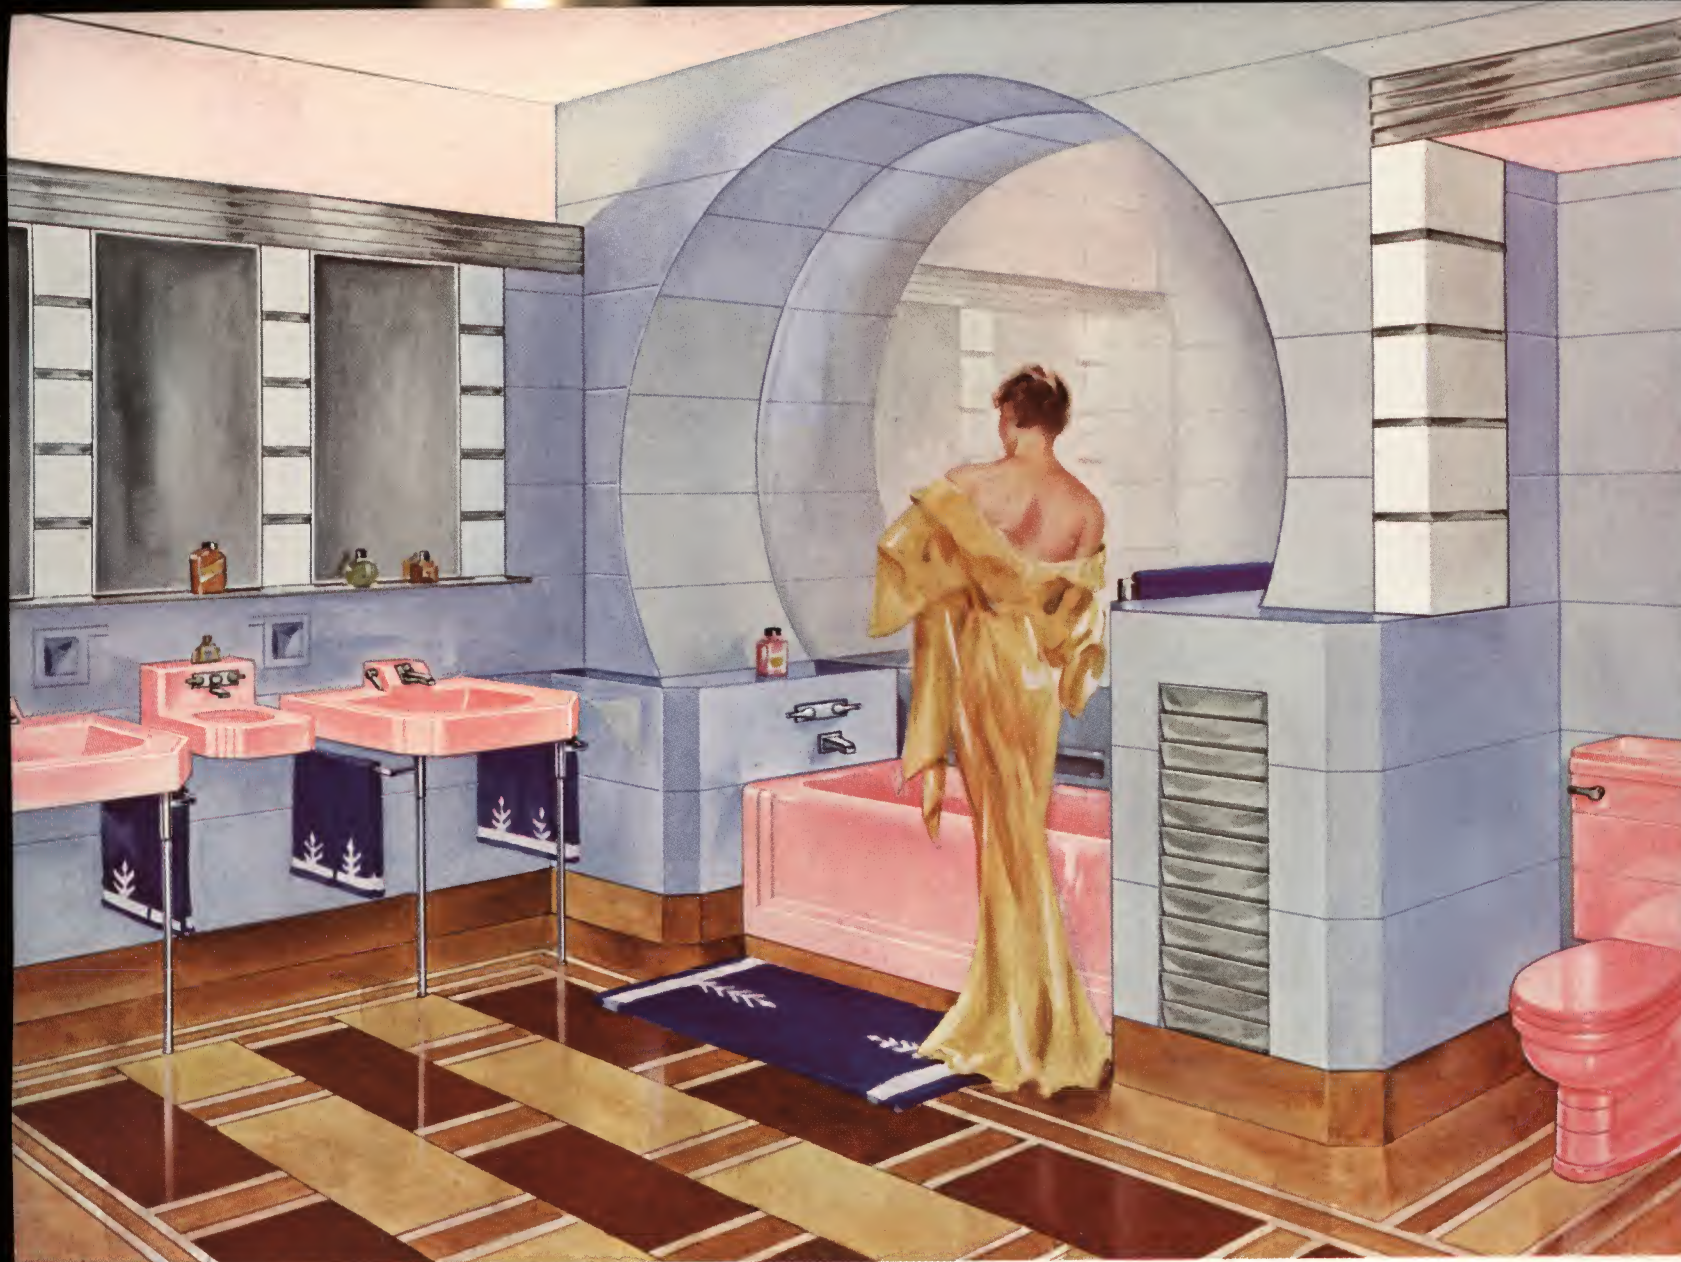

With growing importance attached to the modern bathroom, beauty of line and form becomes more important than ever before. In presenting these completely new groups of bathroom fixtures, Douglas has contributed a remarkable advance in beautifying the bathroom of today—and tomorrow.

But Douglas has done *more* than express a style trend...

The simplicity of these modern Douglas designs makes each piece harmonize with every other. Any combination of fixtures which your personal choice may dictate adapts itself admirably with any form of bathroom decoration. And the broad, gleaming surfaces are easy to keep sparkling clean.

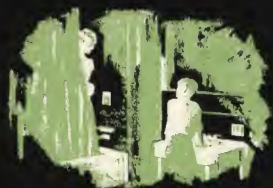

Douglas fixtures restore attractiveness to out-moded bathrooms, and are the final word in bathrooms for new homes. The charm and distinction of these fixtures are *lasting*...

Yet Douglas costs no more than ordinary plumbing fixtures.

This very striking ensemble consists of two Normandie Lavatories, Caprice Dental Lavatory, Carlton Closet, Minerva Recessed Bath.

Today's trend in homes is to more bathrooms, and adequate and pleasing plumbing facilities in each. Douglas here presents a fresh interpretation of the growing (and practical) custom of including at least one double service bathroom in every home.

The lovely Douglas group shown here includes the Mayfair Lavatory, Carlton Closet and the Minerva Recessed Bath with shower.

This smartly modern bathroom proudly reflects the good taste of those who choose Douglas fixtures. Beauty of line...individuality of design...skill of fashioning...all combine to make this an ideal bathroom.

Douglas has set an entirely new standard of beauty in inexpensive plumbing fixtures. The room pictured includes fixtures of inherent distinction and utility—yet will fit into the most modest of building or remodeling budgets.

The very charming Douglas selections illustrated are the Raleigh Lavatory, the Craig Closet and the Neptuna Bath.

The convenience of a first floor lavatory and closet cannot be overestimated... Yet nowhere is there greater need for utmost grace and styling in the plumbing appointments... Observe how well Douglas has achieved this.

•
Compact for small quarters, adaptable for larger rooms, are the Vista Lavatory and the Carlton Closet shown here.

The CLINTON J-4095 is a very quiet closet embodying the same efficient siphonic action that characterizes the Carlton. In paneled bathrooms, particularly, the straight line design of the Clinton is often preferred. Note—on all Douglas closets illustrated—the smartly designed seat.

GLORIA J-4130

CARLTON J-4080—an extremely compact two-piece closet with lower, hygienic bowl and efficient flushing action. Because of its unusually quiet operation and inherent beauty, it is ideal for use in first-floor lavatories (see page 7), as well as the most distinguished bathrooms.

Bath # 1-2-80

ACTON J-4230

In the CRAIG J-4300, Douglas makes available—for the first time—a beautifully styled, yet inexpensive washdown type closet. The Craig's graceful lines harmonize with all modern bathroom decoration. The flat surface of the tank cover provides additional always-needed shelf space.

LEADER J-4271. Here is a closet of conventional design characterized by pleasing lines, long service and exceptionally low cost. It answers all requirements where utmost economy is demanded. In addition to closets shown, Douglas offers many more models for home installation.

Servants Room

The BARCLAY J-20 strikes an entirely new note in modern lavatory design. While only 24 x 20 inches in overall dimensions, this beautiful lavatory provides 120 square inches of space at one side for placing the soap, wash cloth, tooth brush and cream, or shaving equipment.

John's Bath

This distinguished NORMANDIE J-15P lavatory is designed with the view of keeping the fittings compact, leaving ample "shelf" space on three sides of the basin... It is available with pedestal as above, or with smart chromium legs and towel bars, as illustrated on page four.

Bath #1
Bath #2
~~This with chrome legs~~

The MAYFAIR J-25P has integral towel bars and fittings of modern design. The front overflow feature is embodied in this fixture—as in all Douglas china lavatories. Basin, apron and pedestal are easy to keep clean. Available with pedestal or with chromium legs (see page five).

This beautiful RALEIGH J-30L lavatory has an unusual amount of "shelf" space that everyone needs and wants. The fixture measures 20 x 18 inches, with a 4-inch shelf extending the entire width. Note the extremely graceful, compact fittings that are "at home" in any home.

Right: RALEIGH J-30. The same lavatory as shown on the preceding page, but without legs and towel bars. This 20 x 18-inch lavatory provides the same basin space of much larger fixtures. The inherent beauty and graceful lines speak for themselves.

Left: For the lavatory in the hall or understairs, where space is at a premium, the 20 x 13¾-inch VISTA J-35 combines compactness and beauty never before achieved in vitreous chinaware. The shelf space is an innovation in small lavatories.

ATLEE J-345

MELROSE J-505

BELMAR J-131

ATLEE J-295

MILTON J-420

DOUGLAS offers a wide selection of designs in fine quality vitreous china lavatories, at a range of prices to meet every building or remodeling budget. Illustrated here are a few models in wall, pedestal and leg types, which will serve to indicate the broad scope of the Douglas line.

Lavatory

WINSTON D-455

BELNORD D-460

BRENTMORE D-480

BELLWOOD D-445

DEARBORN D-490

Servants' Bowl

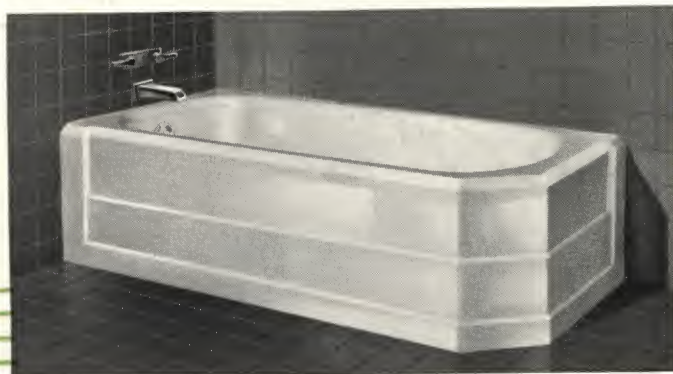

In offering a complete line of enameled cast-iron lavatories, Douglas recognizes the home owners' need for fixtures that are less expensive than vitreous china, but which will give good service. Douglas

enameled ware is available in white or colors, in regular or acid-resisting finishes. Shown here are a few representative lavatories from the Douglas line that are outstanding in their price class.

MINERVA D-120

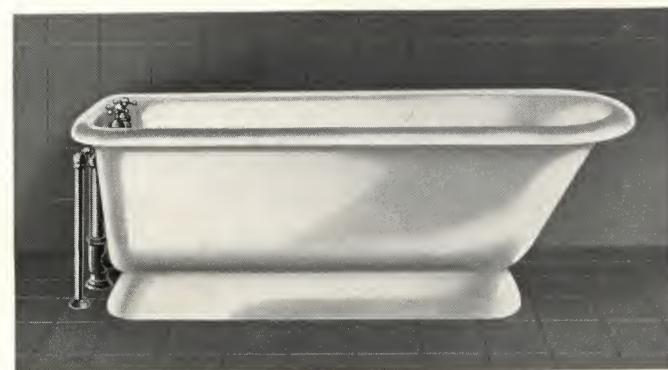

Douglas enameled baths have long been known for their beauty of line and finish. The Minerva Bath and Neptuna Bath, with shower combination or regular wall fittings, are particularly attractive models, styled in keeping with the strikingly modern design of Douglas lavatories and closets.

NEPTUNA D-140

ALCO D-174

CLIMAX D-250

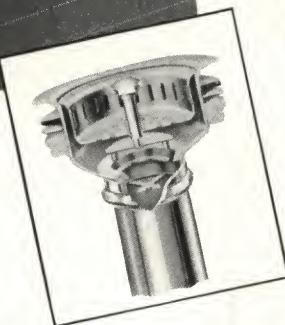

HARLEM D-260

Servant's Bath

Above: Whitehall D-706 Double Drain Board Apron Sink. The new Douglas Swingmixer enhances the beauty of this fixture.

Right: Crumcup D-24 Strainer is a time-saving and labor-saving feature appreciated by every housewife.

Above: Willard D-712 Single Drain Board Apron Sink. In the right or left drain models.

Left: Wakefield D-742K Double Drain Board Sink with enameled cabinet.

Staunton D-756K Single Drain Board Sink—right or left drain board—with enameled cabinet. Also furnished with two doors, without drawers.

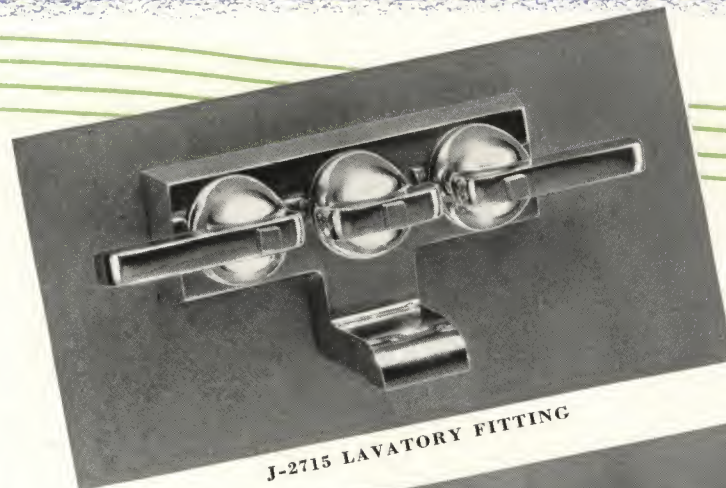

Douglas Kitchen Sinks are available in many sizes and designs, four of which are illustrated here. All are styled to combine beauty with utmost utility. Furnished in regular enamel or acid-resisting finishes.
